

Medium	°C	% of initial strength		
		100h	500h	1000h
Petrol	20	95	95	95
Engine oil	40	100	100	100
Isopropanol	20	95	95	95
Ethanol	20	100	100	100
Freon	20	100	100	100
Air relative humidity 95%	40	75	55	45

ADDITIONAL INFORMATION

Storing

The glue must be kept in original containers, in dry and cool rooms. Recommended storing temperature ranges from +2 °C to +8 °C. Storing at temperatures higher or lower than those stated above may adversely influence the glue properties. Glue in its container be protected against any contamination.

Instruction for use

Przeznaczone do klejenia elementy powinny być suche, cElements to be must dry, clean, and degreased. Glue should be applied directly from the packaging (bottle) fitted with an applicator tip, only onto one of the joined surfaces, and the elements must be passed together immediately. In case of joining areas, use point glue application technique.

Optimum gap - 0.05mm. Max gap should be < 0.1mm.
