Technical Data Sheet

FAST CLEANER F-7

Product Development Department February 2022

Page 1 of 1

PRODUCT DESCRIPTION

Fast Cleaner F-7 is a degreasing and washing agent based on aliphatic solvents. It contains specially selected surfactants. Removes greases, oils and other industrial contaminants. It does not emit toxic fumes and has a delicate fragrance. It does not contain water.

TYPICAL USES

It is a universal product for cleaning and degreasing.

It is designed for washing and degreasing machine parts, components of internal combustion engines and mechanical transmissions, bearings and electrical and electronic components.

Recommended for surface preparation prior to the application of Chester Molecular epoxy composites.

Recommended for cleaning rubber surfaces prior to the application of Chester Molecular polyurethane elastomers.

PRODUCT PROPERTIES

Form		clear fluid
Colour		colourless
Density		$0,724 \text{ g/cm}^3$
Kinematic viscosity at 25°C		0,64 mm ² /s
Evaporation Rate (n-BuAc=100)		165
Surface tension		23 mN/m
Auto Ignition Temperature °C		310
Refractive Index	at 20°C	1.406

OTHER INFORMATION

Storage

The product should be stored in its original packaging.

Application method

The product can be used for washing in bathtubs with the immersion method and applied with a brush, sponge or spraying method.

Spray application is recommended for degreasing prior to the application of epoxy composites.

Additional information

It is also available in a spray pack.
