Technical Data Sheet

CLEANREX II

Research and Development Department

April 2022 Page 1/1

PRODUCT DESCRIPTION

Cleanrex II is a cleaning agent based on aliphatic solvents. It contains specially selected surfactants. Removes grease, oil, soot and other industrial contaminants. It does not emit toxic fumes and has a delicate fragrance. Forms an emulsion with water. Dried up, it provides temporary corrosion protection for steel surfaces.

TYPICAL APPLICATION

It is a universal preparation for cleaning heavily soiled surfaces.

It is intended for degreasing of equipment and machine parts, washing vehicles, internal combustion engines and their components, cleaning mechanical transmissions, bearings, and cleaning fuel tanks.

The content of appropriately selected solvents allows the cleaning of difficult to remove grease and deposits

PROPERTIES

Form transparent liquid

Density [g/cm3] at 25 °C 0,80 green-blue
Pour point <-45 °C
Self-ignition temperature >250°C
Refractive index 1,434

OTHER INFORMATION

Storage

Product should be stored in closed, original containers.

Instruction for use

Depending on the degree of soiling, the preparation can be diluted with water in a ratio of 1: 4. Then it creates an emulsion with very good cleaning properties and does not drip off vertical surfaces. The preparation can be used for manual washing, applied with a brush, sponge or by spraying. Can be rinsed off with water.
