Technical Data Sheet

CLEANREX WZ-2NS

Product Development Department April 2022

Page 1 of 1

PRODUCT DESCRIPTION

Cleanrex WZ-2NS is an alkaline, low-foaming cleaning agent (concentrate). It contains a specially selected composition of surfactants, thanks to which it perfectly removes organic dirt and oil-derivative pollution from steel and cast iron. The preparation is characterized by a low surface tension, thanks to which high washing efficiency is ensured for details with complex shapes, while reducing the consumption of the product. It does not contain caustic soda, solvents and phosphates, it is biodegradable. Contains corrosion inhibitors, water softeners, anti-limescale agents and biocides. It is non-flammable.

TYPICAL USES

It is intended for washing and degreasing of devices and machine parts in closed-circuit industrial washers, in automatic washing machines, pressure units and in ultrasonic cleaners.

It does not damage the cleaned surfaces (metals, varnishes, plastics, rubber, stoneware, terracotta). It can be used cold and hot (up to 90° C).

METHOD OF USE

Before use, the preparation should be diluted with water, in proportions depending on the degree of dirtiness on the surface. In case of heavy contamination, use the product diluted 1:10 (approx. 10% solution). Increased solution temperature increases washing efficiency. The product is intended mainly for use in closed circuits.

Recommended dilutions

Pressure washing:

- 1:10 heavy soiling (approx. 10% solution)
- 1:20 light soiling (approx. 5% solution)
- 1:30 in automatic cleaning machines (approx. 3% solution)

PRODUCT PROPERTIES

Form fluid
Colour light brown
pH 12
Density 1,04 g/cm³

Density 1,04 g/cm³
Boiling point >100°C
Refractive index 1.341

OTHER INFORMATION

Storage

The product should be stored in the original packaging at temperatures over 5°C.
