

CHAIN OIL F-15

Product Development Department

June 2022

Page 1 of 1

PRODUCT DESCRIPTION

Chain oil F-15 is a lubricant based on synthetic and mineral oils. Contains corrosion inhibitors, antioxidant and adhesive additives. It has an excellent ability to adhere to the lubricated surface. Protects against rust. It is characterized by high chemical stability. It is resistant to water, also sea water. It does not contain silicone oil, acids. Does not damage rubber sealing materials (e.g. O-rings).

TYPICAL USES

It is a universal preparation for lubricating light and medium loaded mechanisms.

Recommended for lubrication:

- Chains
- Steel rope
- Guides
- Strands and joints
- Open transmission
- Hinges
- Rolling and slide bearings
- Garden equipment

PRODUCT PROPERTIES

Form	liquid
Colour	light yellow
Density	0,76 g/cm ³
Dynamic viscosity (20°C)	960 mPa s
Max. working temp.	180 °C
(temporarily)	200 °C
Min. working temp.	-30 °C
Self-ignition temp.	240 °C
Copper Strip Test,	
3 h at 100°C (ASTM D130)	a1

OTHER INFORMATION

Storage

The product should be stored in the original packaging.

Application

Product should be applied as aerosol.
