May 2022

Page 1 / 1

### PRODUCT DESCRIPTION

Gasket Remover F-9 is a preparation intended for removing varnish coats. It also removes the remains of seals and gaskets, with particular emphasis on cured anaerobic products. It does not contain carcinogenic substances. Can be used on vertical surfaces.

### APPLICATIONS

Removal of varnish coatings - paints, varnishes, enamels.

Removal of cured adhesives and anaerobic sealants.

The preparation can be used to remove coatings from metal, wooden, concrete, ceramic and glass surfaces. May damage certain plastic surfaces - carefully check the effect of the preparation on a small surface.

### PRODUCT PROPERTIES

Form	spray liquid
Color	colourless
Density	about 0,83 g/cm <sup>3</sup>

### OTHER INFORMATIONS

#### Storage

The product should be stored in original packaging.

#### Application

- 1 By spraying apply an even layer on the coating to be removed
- 2 Wait until the coating separates from the substrate
- 3 Remove the swollen, soft coating with a spatula
- 4 If it is difficult to remove the entire coating, remove the reacted preparation and apply a fresh layer
